

SPA ECLIPSE™

DEL **ozone**™
natural spa sanitation

NEW DESIGN IMPROVED OUTPUT NEXT GENERATION

RELIABILITY

Unsurpassed Life Expectancy

PERFORMANCE

High Ozone Output

BEST VALUE

High Quality, Low Cost

The **Spa Eclipse Next Generation Corona Discharge** system matches the capabilities of our own High Output units at a fraction of the size. Featuring DEL's exclusive Advanced Plasma Gap technology, the newly engineered design is now equipped with Auto Voltage Sensing. It's the reliability, performance and technological advancement you can only expect from DEL Ozone.

Next Generation Corona Discharge AUTO VOLTAGE SENSING

PERFORMANCE VALIDATION

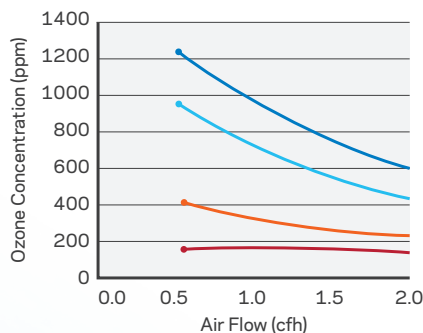

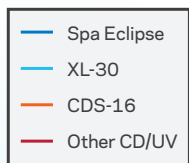

Higher ozone output and longer life than other CD technology, the DEL Ozone Spa Eclipse is the ultimate solution for water treatment in spa applications. Considerably more energy efficient than UV ozone generators, the Spa Eclipse is lower in overall power consumption, heat generation and operating cost.

DEL Ozone systems have been third-party validated to kill up to 99.99% of microorganisms typically found in spas. Ozone sanitizes the water quickly and effectively without the undesirable by-products created by traditional chlorine and bromine chemicals.

PERFORMANCE FEATURES

- > Water Back Flow Resistant
- > Auto Voltage Sensing
- > 100-250V / 50-60Hz
- > Consistent Ozone Output
- > Ozone LED Indicator Light
- > Reduced Nitric Acid By-Product
- > Utilizes Ozone Resistant Materials

SPECIFICATIONS & OZONE OUTPUT

Model	Spa Eclipse
Dimensions	4.9"W x 3.4"H x 2.3"D
Ozone Output	50-70 mg/hr
Voltage	100-250V; 50/60 Hz
Power	10 Watts
Enclosure	Molded ABS
Warranty	Standard - 1 Year

Measurements at Standard Temperature and Humidity
