

Dr. Howard Dryden
Dryden Aqua founder

Dr. Dryden's

The Dr. Dryden story:

Dr. Dryden is an award-winning marine biologist specializing in swimming pool water treatment. His mission is to eliminate toxic chlorine byproducts and provide the best air and water quality on the market.

For over 30 years he has been working with chlorinated systems before successfully introducing his technology to the swimming pool industry.

Enhance Summer is a 3 in 1 product that lowers the cost of water treatment, promotes water clarity and provides a healthy swimming experience for you and your family.

enhance summer

Enhance Summer is a non-toxic easy-to-use 3 in 1 solution designed to provide you with clearer, cleaner and healthier water.

Here are the benefits of using Enhance Summer:

- 1** *Protects chlorine making it last up to 3 times longer*
- 2** *Replaces the need for chlorine stabilizer (cyanuric acid)*
- 3** *Replaces the need for water clarifiers & polishers*
- 4** *Helps to reduce red eye irritation, itchy skin & unpleasant odors*
- 5** *Compatible with all sanitizers, filter systems & pool surfaces*

Enhance Summer is ready to use and comes in 2 convenient sizes.

WHAT IS ENHANCE?

Dr. Dryden's Enhance Summer works by amplifying the energy of the sun, boosting natural photo-oxidation from UV light.

The accelerated energy from the sun forms powerful active free radicals. These free radicals work just like chlorine to remove pollutants. They DO NOT however form combined (inactive) chlorine or harmful by-products.

Enhance Summer also prevents the loss of chlorine therefore eliminating the need for chlorine stabilizers such as cyanuric acid.

Enhance Summer simply "enhances" what the sun does naturally to produce cleaner, clearer and healthier water.

Enhance Summer when used with Dr. Dryden's Activate filter media comes with a lifetime performance guarantee.*

See your dealer for details.

Pool Capacity	Monthly Dosage
15,000 gallons	64 oz. (1/2 gallon)
30,000 gallons	128 oz. (1 gallon)

For other size pools, use proportionate 4 ounce of Dr. Dryden's Enhance Summer for every 1,000 gallons of pool water.

HOW TO DETERMINE POOL CAPACITY:

ROUND POOLS

Calculate diameter x average depth x 5.9 = Pool Capacity

OVAL POOLS

Calculate Length x width x average depth x 6.6 = Pool Capacity

RECTANGULAR POOLS

Calculate Length x width x average depth x 7.5 = Pool Capacity

Lifetime Performance Guarantee Criteria:

1. Pool water must be tested by a professional pool dealer on a bi-weekly basis
2. Filter must be in good working condition
3. Backwash your filter once the pressure displayed on your pressure gauge is 8 - 10 psi over the starting level

Dr. Dryden's Enhance Summer must be used along with Dr. Dryden's Activate (glass filter media) to obtain this lifetime performance guarantee

This guarantee is nontransferable
